PROJECTS

Building Bayesian Influence Ontologies

This project, which is currently in progress under supervision by Dr. Ritesh Ajoodha, aims to develop a method by which the influence between interacting models can be modeled as a Bayesian network and learned from data using score-based structure learning techniques. Example applications include plagiarism detection and detecting influence between musical pieces.

TECHNICAL SKILLS

Programming - Python, C, C++, Java, Matlab, Javascript

Computer Science - Machine Learning (specialising in probabilistic graphical models), Image Processing, High Performance Computing, Software Design

WORK EXPERIENCE

University of the Witwatersrand <i>Tutor</i>	2018-2019
--	-----------

- Tutoring 3rd year machine learning, 3rd year computer graphics, and 1st and 2nd year computational and applied mathematics

University of the Witwatersrand <i>Assistant</i>	January 2018
--	--------------

- Restructuring of data management systems for assets of the School of Physics

ACADEMIC ACHIEVEMENTS

University of the Witwatersrand

2018 - Recipient of the Liberty Life Gold Medal for outstanding performance in Computer Science III

2018 - Awarded the prize for top student in Computational and Applied Mathematics III

2018 - Recipient of the Herbert Le May Prize for the best third year science student majoring in Applied Mathematics

2016-2018 - Achieved a spot on the Dean's List in the 1st, 2nd and 3rd years of study

St John's College
